## ASIA-PACIFIC B2C E-COMMERCE MARKET 2015

### KEY FINDINGS

### ASIA PACIFIC TO GRAB A LARGER SHARE OF GLOBAL B2C E-COMMERCE

Asia-Pacific is the global leader in B2C E-Commerce's share of total retail sales, ahead of regions such as Western Europe and North America. Asia-Pacific is home to three of the top seven countries with the largest B2C E-Commerce sales worldwide, according to the research results of yStats.com. The largest of them, China, vies with the USA for global leadership as the biggest B2C E-Commerce market. In the next five years, the Asia-Pacific region is projected to account for a still more significant part of the global B2C E-Commerce market, with this growth attributed primarily to emerging markets, such as China and India, while the global share of advanced markets including Japan and South Korea is predicted to decline.

The yStats.com report further stresses that while countries such as Japan, New Zealand and Australia were ahead of others in Asia-Pacific in terms of Internet penetration, China, India and Thailand demonstrated significantly higher mobile shopper penetration rates than these advanced markets. Other important market trends are cross-border online shopping, led by Australia, and social commerce, especially pronounced in some Southeast Asian markets, such as Indonesia.

Overall, B2C E-Commerce sales in Asia-Pacific are projected to increase at moderate double-digit rates through 2019, with India and countries in Southeast Asia especially standing out in terms of forecasted growth rates, as yStats.com's report explains. Investors have acknowledged this growth trend by funding various E-Commerce merchants in the Asia-Pacific region. In 2014, Indian companies, including Flipkart and Snapdeal, and Chinese platforms like Meituan and Dianping accounted for nine out of the top ten E-Commerce investment deals in the region. Alibaba Group and JD.com, both based in China, remain the leading E-Commerce companies in Asia, while international players such as Amazon, Wal-Mart and eBay also maintain significant presence.

## ASIA-PACIFIC B2C E-COMMERCE MARKET 2015 REPORT-SPECIFIC SAMPLE CHARTS

## ASIA-PACIFIC B2C E-COMMERCE MARKET 2015 METHODOLOGY

### GENERAL METHODOLOGY OF OUR MARKET REPORTS

- The reports are compiled based on secondary market research. Secondary research is information gathered from previously published sources. Our reports are solely based on information and data acquired from national and international statistical offices, industry and trade associations, business reports, business and company databases, journals, company registries, news portals and many other reliable sources. By using various sources we ensure maximum objectivity for all obtained data. As a result, companies gain a precise and unbiased impression of the market situation.
- Cross referencing of data is conducted in order to ensure validity and reliability.
- The source of information and its release date are provided on every chart. It is possible that the information contained in one chart is derived from several sources. If this is the case, all sources are mentioned on the chart.
- The reports take into account a broad definition of B2C E-Commerce, which might include mobile commerce. As definitions may vary among sources, exact definition used by the source (if available) is included at the bottom of the chart.
- Our reports include text charts, pie charts, bar charts, rankings, line graphs and tables. Every chart contains an Action Title, which summarizes the main idea/finding of the chart and a Sub Title, which provides necessary information about the country, the topic, units or measures of currency, and the applicable time period(s) to which the data refers. With respect to rankings, it is possible that the summation of all categories amounts to more than 100%. In this case, multiple answers were possible, which is noted at the bottom of the chart.
- Reports are comprised of the following elements, in the following order: Cover page, preface, legal notice, methodology, definitions, table of contents, management summary (summarizing main information contained in each section of report) and report content (divided into sections and chapters). When available, we also include forecasts in our report content. These forecasts are not our own; they are published by reliable sources. Within Global and Regional reports, we include all major developed and emerging markets, ranked in order of importance by using evaluative criteria such as sales figures.
- If available, additional information about the data collection, for example the time of survey and number of people surveyed, is provided in the form of a note. In some cases, the note (also) contains additional information needed to fully understand the contents of the respective data.
- When providing information about amounts of money, local currencies are most often used. When referencing currency values in the Action Title, the EUR values are also provided in brackets. The conversions are always made using the average currency exchange rate for the respective time period. Should the currency figure be in the future, the average exchange rate of the past 12 months is used.
- The reports include mainly data from the last 12 months prior to the date of report publication. Exact publication dates are mentioned in every chart.

### METHODOLOGY OF OUR ASIA-PACIFIC B2C E-COMMERCE MARKET 2015 REPORT

- In this report, major B2C E-Commerce trends, sales figures, share of the total retail market, main online product categories, and relevant information about Internet users, online shoppers and leading E-Commerce companies are included.
- The regional chapter opens the report, highlighting regional developments, such as sales, and international comparisons of the countries in the region among themselves and to other countries worldwide. The comparisons concern criteria related to B2C E-Commerce, such as Internet and online shopper penetration.
- The rest of the report is divided into countries. The countries are presented in two groups: advanced and emerging B2C E-Commerce markets, considering criteria such as B2C E-Commerce's share of total retail sales, Internet and online shopper penetration. Within each group, the countries are presented in the order of descending B2C E-Commerce sales. Where no comparative sales figures were available, other relevant criteria were applied to determine the order, such as Internet and online shopper penetration.
- Each country chapter starts with an overview of the B2C E-Commerce market in the respective country.
- Next, the "Trends" section provides an overview of B2C E-Commerce market trends, such as social commerce, cross-border online shopping, M-Commerce, omnichannel retail and regulatory trends.
- The section "Sales & Shares" includes the development of B2C E-Commerce sales, including historical sales and forecasts, where available. Furthermore, this section shows the development of B2C E-Commerce's share of the total retail market.
- In the "Users & Shoppers" section, a review of the development of Internet penetration and online shopper penetration is included.
- Afterwards, the section "Products" shows the leading product categories purchased online.
- The next two sections, "Payment" and "Delivery", cover information related to delivery and payment methods most used by online shoppers.
- Finally, the "Players" section includes information about the leading E-Commerce players, such as online retailers and marketplaces.
